Technical Lead

Applied AI Consulting

Developing API using serverless, AWS, DynamoDB, S3 bucket. Designed and Developed Invoice generation API for a client app using python Designed BDD pipeline for client VOIP calling. Using docker containers to recreate issues for a monitoring tool

Apr 2019 - Oct 2019

Machine Learning Intern

SAIG

Machine Learning

Jan 2017 - Jul 2018

Software Associate

BlueConch Technoogies

Trained for DevOps Worked for a client performing continuous monitoring using Zabbix Setting up Zabbix and maintaining the database on MySQL

💼 Projects

4 Weeks

Testing using BDD in Python

- Developed a BDD framework using Behave and Jenkins to streamline the testing process
- Utilized Python to write code for a SIP-based framework, contributing to improved efficiency and reliability

61 Days

Indian Coin Detection

Object Detection using Tensorflow

183 Days

Face Detection for Marathon Runners

Writing Python code to connect program to goPro cameras. Taking images and saving it to folders using python code. Training a Reset model for faces of runners.

5 Weeks

Document Chat App

Chat App using Generative AI and Langchain to chat with documents like PDF, Excel, CSV, PPT etc

4 Weeks

Resume Scoring

??? Similarity Scoring: Achieved high accuracy in identifying relevant resume sections that matched the job description.
??? Compatibility Assessment: Generated insightful compatibility scores that provided a comprehensive assessment of the resume against the job description.
??? Deployment: Partially successful in deploying on Amazon Bedrock, with ongoing efforts to optimize the deployment process.

Certification

- Rasa Developer Certification (Valid upto October 2022)
- Deep Learning using Tensorflow IBM
- Microsoft Azure Fundamentals: AZ-900
- Azure ai fundamentals (ai-900) by microsoft
